Contents

1	Topics in Market Efficiency	17
1.1	EMH and Expected Returns	17
1.1.1	Random Walk Hypothesis and Expected Returns	17
1.1.2	Predictable Expected Returns Are Consistent with the EMH .	20
1.1.3	EMH Is About Abnormal Returns	21
1.2	EMH, Trading Costs, and Limits to Arbitrage	23
1.2.1	EMH and Trading Costs	23
1.2.2	Limits to Arbitrage: Definition	25
1.2.3	The Difference between Trading Costs and Limits to Arbitrage	28
1.3	EMH, Competition, and Information Production	29
1.3.1	People Making the Market Efficient Will Be Rewarded	29
1.3.2	EMH Is Similar to Perfect Competition	31
1.4	EMH: Conclusion	33
2	Trading Costs	35
2.1	Price impact	35
2.1.1	Order Book Example	35
2.1.2	Hiding in the Volume	37

2.1.3	Determinants of Price Impact	38
2.1.4	Recent Trends in Price Impact	39
2.1.5	Measuring Price Impact	40
2.2	Bid-Ask Spread	41
2.2.1	The Market Maker Example	41
2.2.2	Determinants of Bid-Ask Spread	42
2.2.3	Bid-Ask Spread as a Trading Cost	43
2.2.4	Measuring the Bid-Ask Spread	44
3	Short Sales	48
3.1	Uses of Shorting	48
3.1.1	Short Sales as an Insurance	48
3.1.2	Zero-Investment Portfolios	49
3.1.3	Alpha as a Trading Strategy Return	51
3.2	Short-Sale Constraints and Mispricing	53
3.2.1	The Winner's Curse	53
3.2.2	The Miller (JF 1977) Story	54
3.2.3	Determinants of Shorting Fees	56
3.2.4	Short-Sale Constraints and Uncertainty	57
4	Predictability of Risk	59
4.1	Predictability Basics	59
4.1.1	Why Expected Return Is Predictable?	59
4.1.2	Treasury Bills, Inflation, and Expected Market Return	61

<i>CONTENTS</i>	5
4.1.3 Default Premium and Expected Market Return	63
4.1.4 Term Premium and Expected Market Return	64
4.1.5 Dividend Yield and Expected Market Return	65
4.2 Long-Run Predictability Caveats	66
4.2.1 Long-Run Predictability in an Efficient Market	66
4.2.2 Long-Run Predictability in an Irrational Market	66
4.2.3 Long-Run Predictability and Statistical Caveats	69
4.3 Expected and Unexpected	72
4.3.1 Higher Expected Return Means Lower Current Return	72
4.3.2 Back to Inflation and Expected Return	74
4.3.3 Why Macro Variables Should Be Lagged	75
4.3.4 "Change" Stands for "News"	76
4.3.5 High Expected Returns During Recessions? Yes!	77
5 Conditional CAPM	78
5.1 Conditional CAPM: Theory	78
5.1.1 Risk According to the CAPM	78
5.1.2 Risk According to the Conditional CAPM	79
5.1.3 How Important is the Risk Captured by the Conditional CAPM	81
5.2 Conditional CAPM in the Data	84
5.2.1 First Look at the Value Effect	84
5.2.2 Empirical Setup	87
5.2.3 Interpreting the Results	89
5.2.4 Conditional CAPM Works, but Not by Enough	90

6	Consumption CAPM and Intertemporal CAPM	92
6.1	Consumption CAPM	92
6.1.1	Risk According to Consumption CAPM	92
6.1.2	Consumption CAPM in Real-Life Examples	94
6.2	Intertemporal CAPM	95
6.2.1	ICAPM Hunts for Consumption Proxies	95
6.2.2	ICAPM Controls for Shifting Wealth from Good to Bad Periods	96
6.2.3	ICAPM Example: Inflation Risk	98
6.2.4	ICAPM Is Broader than Conditional CAPM	99
6.3	ICAPM and the Value Effect: An Example	100
6.3.1	VIX and the Business Cycle	100
6.3.2	Change in VIX as an ICAPM Factor	103
6.3.3	Factor-Mimicking Portfolio	105
6.4	ICAPM and Multifactor Models	109
6.4.1	Fama-French Model as APT	109
6.4.2	Fama-French Model as ICAPM	111
7	Introduction to Anomalies	113
7.1	Anomaly: Definition	113
7.2	First Possible Explanation: Rational Stories	116
7.2.1	Ad-hoc CCAPM/ICAPM and Other Ways to Link Anomalies to Risk	116
7.2.2	Three Views on the Fama-French Model	119
7.3	Second Possible Explanation: Behavioral Stories	122

7.3.1	Limits to Arbitrage	122
7.3.2	Speculation and Noise Traders	126
7.4	Third Possible Explanation: Are Anomalies Real?	129
7.5	Conclusion	132

8 Value Effect 134

8.1	Definition	134
8.2	Rational Stories	135
8.2.1	Investment Story	135
8.2.2	Volatility Risk Story	142
8.2.3	Other Risk-Based Stories	145
8.3	Behavioral Stories	148
8.3.1	Value Effect and Size	148
8.3.2	Value Effect and Idiosyncratic Volatility	150
8.3.3	Value Effect and Institutional Ownership	152
8.3.4	Value Effect and Earnings Announcements	155
8.4	Is the Value Effect Real?	157
8.4.1	Trading Costs Story	157
8.4.2	Value Effect Out-of-Sample	158

9 Momentum 161

9.1	Definitions	161
9.1.1	Price Momentum	161
9.1.2	Short-Term Reversal	162

9.1.3	Long-Term Reversal	164
9.1.4	Post-Earnings Announcement Drift	167
9.1.5	Earnings Momentum	169
9.2	Rational Stories	170
9.2.1	Initial Remarks	170
9.2.2	Momentum Returns and the Business Cycle	172
9.2.3	Momentum Risk and the Business Cycle	174
9.2.4	Earnings Momentum Factor	176
9.3	Behavioral Stories	178
9.3.1	Momentum for Small, Young, and Volatile Stocks	178
9.3.2	Momentum for High Turnover Stocks	180
9.3.3	Momentum for Micro Caps	181
9.3.4	Momentum for Growth Firms	182
9.3.5	Momentum and Reversal during Bull and Bear Markets	183
9.3.6	Momentum and Earnings Announcements	184
9.4	Is Momentum Real?	186
9.4.1	Trading Cost Story: Summary of the Evidence	186
9.4.2	Trading Cost Story: Example	187
9.4.3	Momentum Out of Sample	188
10	New Issues Puzzle	190
10.1	Definition	190
10.1.1	How Stock Is Issued	190
10.1.2	The Degree of the Underperformance	191

10.1.3	New Issues Puzzle in Multi-Factor Models	192
10.1.4	New Issues Puzzle in Event Time	193
10.1.5	Related Puzzles	195
10.2	Risk-Based Stories	197
10.2.1	Firm-Type Stories: New Issues and the Small Growth Anomaly	198
10.2.2	Firm-Type Stories: Volatility Risk Story	199
10.2.3	Firm-Type Stories: New Issues and Investment Factor	200
10.2.4	Risk-Shift Stories: New Issues and Leverage	202
10.2.5	Risk-Shift Stories: New Issues and Turnover	203
10.3	Behavioral Stories	205
10.3.1	Basic Behavioral Story	205
10.3.2	Behavioral Story and Different Types of Issues	206
10.3.3	Behavioral Stories, Size, and Market-to-Book	207
10.3.4	New Issues and Earnings Management	208
10.4	New Issues Puzzle: Measurement Issues	210
10.4.1	Calendar-Time vs. Event-Time	210
10.4.2	Pseudo Market-Timing	211
11	Uncertainty Effects	214
11.1	Definitions	214
11.1.1	Idiosyncratic Volatility and Expected Returns	214
11.1.2	Idiosyncratic Volatility Discount	218
11.1.3	Analyst Disagreement Effect	221
11.1.4	Turnover Effect	222

11.1.5	Turnover Variability Effect	223
11.2	Risk-Based Stories	225
11.2.1	Johnson (JF 2004) Model	225
11.2.2	Extending the Johnson Model: Volatility Risk	226
11.2.3	Extending the Johnson Model: Cross-Section	228
11.2.4	Volatility Risk Explains the Uncertainty Effects	230
11.3	Mispricing Stories	233
11.3.1	Miller (JF 1977) Story Is Not Behavioral	233
11.3.2	Residual Institutional Ownership and Uncertainty Effects . . .	234
11.3.3	Probability to Be on Special	237
11.3.4	Uncertainty Effects, Short-Sale Constraints, and Volatility Risk	239
11.3.5	Credit Rating and Uncertainty Effects	241
11.4	Are Uncertainty Effects Real?	243
11.4.1	Idiosyncratic Volatility Discount at NYSE	243
11.4.2	Lagged and Expected Idiosyncratic Volatility	244
11.4.3	Idiosyncratic Volatility Discount and Short-Term Reversal . .	246
11.4.4	Analyst Disagreement Effect and Liquidity	247
11.4.5	Uncertainty Effects Around the World	248
12	Seasonality in Stock Returns	250
12.1	January Effect	251
12.1.1	Turn-of-the-Year Effect	251
12.1.2	Small Firms in January	252
12.1.3	Small Growth Firms in January 2001	255

<i>CONTENTS</i>	11
12.1.4 The Other January Effect	256
12.2 Monday Effect	258
12.2.1 Weekend Risk and Volatility	258
12.2.2 Monday Effect: Discovery and Disappearance	258
12.2.3 Monday Effect and the Bid-Ask Bounce	259
12.3 Monday Effect for Options	261
12.3.1 Where Did the Monday Effect Go?	261
12.3.2 Monday Effect for Puts?	263
12.3.3 Monday Effect and the Delta	264
12.3.4 Robustness of the Monday Effect	266
12.3.5 Monday Effect and Limits to Arbitrage	267
13 Distress Risk Puzzle	269
13.1 Definition	269
13.1.1 Default Risk as a Covariance	269
13.1.2 Distressed Firms and Default Risk	270
13.1.3 O-Score and Z-Score	271
13.1.4 O-Score, Z-Score, and Returns	273
13.2 Risk-Based Stories	273
13.2.1 Risk-Shifting Around Bankruptcy	273
13.2.2 Leverage and Self-Selection	275
13.2.3 Johnson (JF 2004) Model	276
13.3 Behavioral Stories	279
13.3.1 Distress Risk Puzzle and Market-to-Book	279

13.3.2	O-score, MB, and Earnings Announcements	281
13.3.3	Credit Rating Effect	282
13.3.4	Credit Rating Effect in Recessions	283
13.3.5	Credit Rating Effect and Downgrades	284
13.3.6	Credit Rating Effect in Cross-Section	285
13.3.7	Credit Rating Effect and Analyst Disagreement	287
13.4	Measurement Issues	288
13.4.1	Errors-in-Variables Cannot Explain Anomalies	288
13.4.2	Equity as a Call Option on the Assets	290
13.4.3	O-Score and R&D Expenses	291
14	Accrual Anomaly	294
14.1	Definition	294
14.1.1	What Are Accruals?	294
14.1.2	Accrual Anomaly	296
14.1.3	How to Measure Accruals?	296
14.1.4	Discretionary Accruals	297
14.1.5	What Drives the Accrual Anomaly?	299
14.2	Risk-Based Stories	300
14.2.1	Accrual Anomaly and Value Effect	300
14.2.2	Accrual Anomaly and Investment Factor	302
14.2.3	Predicting Accrual Anomaly	303
14.3	Behavioral Stories	304
14.3.1	Accrual Anomaly in Cross-Section	304

<i>CONTENTS</i>	13
14.3.2 Accrual Anomaly and Earnings Announcements	307
15 Topics in Performance Measurement	309
15.1 Alpha and Appraisal Ratio	309
15.1.1 Alpha	309
15.1.2 Appraisal Ratio	311
15.1.3 Alpha or Appraisal Ratio?	313
15.2 Zero-Investment Portfolios	314
15.2.1 Set the Risk-Free Rate to Zero	314
15.2.2 Numerical Example	315
16 Topics in Performance Evaluation	317
16.1 What the Manager Does That You Cannot?	317
16.1.1 Multifactor Models and Performance Evaluation	317
16.1.2 R-square and Portfolio Manager's Activity	319
16.1.3 Carhart Model	321
16.2 Alpha and Management Fees	323
16.2.1 Who Gets the Alpha?	323
16.2.2 Persistence of Performance	324
16.2.3 What Drives the Alpha?	327
16.2.4 Mutual Fund Flows	329
17 An Example of Performance Measurement and Evaluation	331
17.1 Four Ways to Measure Risk	331
17.2 An Example of the Analyst Disagreement Effect	333

17.2.1	Applying the Carhart Model	333
17.2.2	The Conditional CAPM Take on Risk	336
17.2.3	The ICAPM Take on Risk	340
18	The Downfall of Levered ETFs	343
18.1	Levered ETFs: Definition and History	343
18.2	Constant Leverage Trap	344
18.3	Constant Leverage Trap and Pseudo Market Timing	347
18.4	Constant Leverage and Trading Costs	348
18.4.1	Constant Leverage Trap Is Not the Only Reason Levered ETFs Underperform	348
18.4.2	Controlling for Trading Costs Explains the Underperformance of Levered ETFs	349
18.4.3	A New Measure of Trading Costs	351
19	Liquidity and Expected Returns	352
19.1	Liquidity: A Special Characteristic	352
19.2	Different Holding Periods and Clientele Effects	354
19.2.1	Theory: Bid-Ask Spread and Expected Returns	354
19.2.2	Example 1: Two Stocks, Two Investors	355
19.2.3	Example 2: Three Stocks, Three Investors	357
19.2.4	Amihud and Mendelson: Many Stocks, Many Investors	360
19.3	Price Impact and Expected Returns	361
19.3.1	The Amihud Measure and Expected Returns	361

<i>CONTENTS</i>	15
19.3.2 Example 3: Two Stocks, Two Investors	362
19.3.3 Example 4: Three Stocks, Two Investors	364
19.3.4 Example 5: Two Stocks, Three Investors	366
20 Liquidity Risk	368
20.1 Liquidity as a State Variable	368
20.2 Forming a Liquidity Risk Factor	370
20.3 Three Dimensions of Liquidity Risk	372
20.4 Pastor-Stambaugh Factor	374
20.5 Examples with Liquidity Risk Factors	376
21 Introduction to Behavioral Finance	379
21.1 The Starting Point and the Road Ahead	379
21.1.1 Mispricing and Limits to Arbitrage	379
21.1.2 What We Need to Do	380
21.2 Noise Traders and Covariances: Theory	381
21.2.1 Starting Point: Those Who Create Mispricing Should Go Broke	381
21.2.2 How Those Who Create Mispricing Avoid Going Broke	383
21.2.3 Characteristic and Covariances: A New Take	385
21.3 Noise Traders and Covariances: Evidence	386
21.3.1 Index Additions and Deletions	386
21.3.2 Betas and Infrequent Trading	388
21.3.3 Measuring Investor Sentiment	389
21.3.4 Sentiment and Anomalies	392

22 Overview of Select Behavioral Theories	395
22.1 Psychological Biases and Momentum	395
22.1.1 Conservatism Bias and Representativeness Heuristic	395
22.1.2 Conservatism Bias and Representativeness Heuristic in One Model	396
22.1.3 Overconfidence and Self-Attribution	398
22.1.4 Overconfidence and Self-Attribution in One Model	399
22.2 Prospect Theory	401
22.2.1 Equity Premium Puzzle	401
22.2.2 Mental Accounting and Equity Premium	403
22.2.3 Prospect Theory and Skewness Preference	406
22.3 Asset Pricer's Take on Behavioral Finance	408
22.3.1 Eugene Fama on Behavioral Finance	408
22.3.2 Aggregation and Data Mining	410
