

*Micromelus Silannus*, Fem. *Zenoe-niger*, *cyaneo-varius*, *antennæ fulvæ*, *pedes fulvi*, *alæ fuscae*.

Corpus aeneo-nigrum, subtus cyaneo-nigrum, breve, latum, convexum, parum nitens, scitissime squameum, parce hirtum: caput transversum, breve, thorace latius; vertex latus; frons impressa, abrupte declivis; ocelli picei, mediores, non extantes; ocelli vertice triangulum figentes; medius per parum antepositus; antennæ fulvæ, ad os insertæ, basi graciles lineares: os piceum; thorax ovatus; prothorax brevissimus; mesothoracis scutum longitudine latius; parapsidæ scuto fere in unum conflusæ; paraptera et epimera magna; scutellum subrhombiforme, postice latius; metathorax brevis, declivis, postice angustus; petiolus brevissimus; abdomen subrotundum, æneum, nitens, læve, supra planum, subus carinatum, thorace paulo latius et multo brevius; pedes fulvi, simplices, subæquales: alæ fuscae, mediores; squamulæ piceæ; nervi fusci; nervus humeralis ulnari duplo longior, radialis ulnari brevior cubitali vix longior, cubitalis sat longus; stigma medio-re. (Corp. long. lin.  $\frac{2}{3}$ ; alar. lin.  $1\frac{1}{2}$ .)  
Mount Wellington.

VIII.—*Descriptions of Chalcidites discovered in St. Vincent's Isle by the Rev. Lansdown Guilding. By FRANCIS WALKER, Esq., F.L.S.*

*Dectonoma Oretilla*, Mas et Fem. *Fulvo-flava ferrugineo-varia*, *antennæ fulvæ*, *pedes flavi*, *alæ limpideæ*.

Corpus convexum, sublineare, fulvo-flavum, nitens, subtilissime punctatum, parce hirtum: caput transversum, breve, thorace paulo latius; vertex latus; frons impressa, abrupte declivis; ocelli rufi, mediores, non extantes; antennæ fulvæ, clavatæ, thorace non longiores; articulus 1<sup>us</sup> longus, gracilis; 2<sup>us</sup> graciliformis; 3<sup>us</sup> et 4<sup>us</sup> minimi; 5<sup>us</sup> et sequentes breves, usque ad 9<sup>um</sup> latentes; clava fusiformis, acuminata, articulo 9<sup>o</sup> multo latiore et plus duplo longior; thorax ovatus; prothorax maximus, transversus, subquadratus, postice ferrugineo-maculatus; mesothoracis scutum brevissimum; parapsidæ suture vix conspicuæ; scutellum subrotundum; discus ferrugineus; metathorax transversus, brevis; petiolus brevis; abdomen ovatum, læve, *mas* thoracis longitudine, *fem.* thorace paulo longius subtus carinatum apice acuminatum fuscum; vitta per dorsum interrupta fusca; pedes pallide flavi, simplices, subæquales: alæ limpideæ; squamulæ fulvæ; nervi fulvi; nervus humeralis ulnari fere duplo longior, radialis ulnari non brevior cubitali plus duplo longior; stigma minutum. (Corp. long. lin. 1; alar. lin.  $1\frac{1}{2}$ .)

*Pteronatus Heice*, Fem. *Zenoe-viridis*, *antennæ fulvæ*, *pedes flavi*, *alæ limpideæ*.

Corpus convexum, aeneo-viride, nitens, scitissime squameum, parce hirtum: caput transversum, breve, thorace latius; vertex latus; frons impressa, abrupte declivis; ocelli rufi, mediores, non extantes; antennæ fulvæ, extrossum crassiores, thorace vix longiores; articulus 1<sup>us</sup> longus, gracilis; 2<sup>us</sup> cyathiformis; 3<sup>us</sup> et 4<sup>us</sup> minimi; 5<sup>us</sup> et sequentes breves, usque ad 10<sup>um</sup> latentes; clava longiconica, acuminata, articulo 10<sup>o</sup> duplo longior; thorax ovatus; prothorax transversus, brevissimus; mesothoracis scutum longitudine latius; parapsidæ suture vix conspicuæ; scutellum suboblongum, antice truncatum; metathorax obconicus, mediores, declivis; petiolus brevissimus; abdomen fusiforme, læve, supra depressum, subtus carinatum, apice acuminatum, thorace longius et angustius; pedes lacte flavi, simplices, subæquales: alæ limpideæ; squamulæ fulvæ; nervi flavi; nervus humeralis

radialis ulnari vix brevior, cubitalis sat longus; stigma medio-re. (Corp. long. lin.  $1-\frac{1}{2}$ ; alar. lin.  $1\frac{1}{2}-2$ .)  
Mount Wellington.

(Genus *LELAVS*, *Haldays MSS.*)

*Lelavus* (Corp. angustum, sublineare, convexum, nitens, scitissime squameum, latius læve, parce hirtum: caput transversum, breve, thoracis latius; vertex angustus; frons impressa, abrupte declivis; ocelli magni, non extantes; antennæ triangulum figentes; antennæ gracillime, extrossum crassiores, thorace paulo breviores; articulus 1<sup>us</sup> longus, gracilis; 2<sup>us</sup> graciliformis; 3<sup>us</sup> et 4<sup>us</sup> minimi; 5<sup>us</sup> et sequentes longi, usque ad 10<sup>um</sup> latentes; clava linearis, apice obtusa, articulo 10<sup>o</sup> duplo longior; thorax ovatus; prothorax brevis, antice angustus; mesothoracis scutum subrotundum; parapsidæ suture bene determinatæ, postice conspicuæ; scutellum obconicum; metathorax mediores, obconicus, declivis; petiolus brevissimus; abdomen longioratum, breve, subus profunde carinatum; nervi fusci; segmentum 1<sup>um</sup> maximum; oviductus exsertus; pedes longi, graciles, breves; pedes longi, graciles, simplices, subæquales; femora crassa; tibiae late; mesopodes subcrassæ; coxæ parvæ; nervus humeralis ulnari sat longior, radialis ulnari non longior, cubitalis sat longior; stigma medio-re.)

*Lelavus* *pubescens* (Haldays MSS.), Fem. *Cuprea*, *antennæ fuscae flavo-fulvæ*, *pedes favi*, *prothorax maculosa*.

Corpus cupreum, viridi-varium; ocelli et ocelli rufi; antennæ fuscae, flavo-fulvæ, apice flavæ; articulus 1<sup>us</sup> flavus; oviductus vaginæ fulvæ, apice fulvæ; pedes favi; ungues et pulvilli fusci; alæ limpideæ; prothorax fusco-maculosa; squamulæ fulvæ; nervi fulvi. (Corp. long. lin.  $1\frac{1}{2}$ ; alar. lin.  $2\frac{1}{2}$ .)

Genus *LDARVES*.

*Ldarves* (Corp. sublineare, depressum, læve, nitens, parce hirtum: caput transversum, breve, thoracis latitudine; vertex sat latus; palpi biarticulati; ocelli non extantes; antennæ breves, clavate; articulus 1<sup>us</sup> longus, 2<sup>us</sup> cyathiformis; 3<sup>us</sup> et sequentes brevissimi; thorax ovatus; prothorax magnus, transversus; mesothoracis scutum impressum, longioratum; parapsidæ suture remote, bene determinatæ, postice approximatae; scutellum magnum, transversum, bisulcatum; metathorax magnus, subquadratus; petiolus vix nullus; abdomen longior-ovatum, thorace paulo longior, antice angustum, 2<sup>um</sup> segmentum 1<sup>um</sup> magnum, 2<sup>um</sup> et sequentia brevita; mesopodes longissimas; vaginæ corpore triplo longiores; propedum coxæ crassa; femora crassa; tibiae late; mesopodes graciles; coxæ parvæ; nervus humeralis ulnari sat longior; femora crassa; tibiae subcrassæ; tarsorum segmenta ad 11<sup>um</sup> certantes, 5<sup>um</sup> 4<sup>o</sup> paulo longior; ungues et pulvilli minimi; nervus humeralis longus, ulnaris brevissimus, radialis longus; nervus cubitalis longissimus, arcuatus, ulnari longior; stigma medio-re.)

*Ldarves* (Corp. laticornis, *Viridicrenus*, *abdomen cupreum*, *antennæ nigre*, *pedes favi*, *alæ albo-limpideæ*.)

Corpus viridicrenum; ocelli et ocelli rufi; antennæ nigre; abdomen cupreum, latius; pedes favi; ungues et pulvilli favi; nervus humeralis longus, ulnaris brevissimus, radialis longus; nervus cubitalis longissimus, arcuatus, ulnari longior; stigma medio-re.)

*Ldarves* (Genus, *Mas*, *Viridis*, *abdomen cupreum*, *antennæ fulvæ*, *pedes favi*, *alæ albo-limpideæ*.)

Corpus breve, convexum, viride, nitens, scitissime squameum, parce
